AVG Cloud Management Console

AVG Cloud Management Console is an easy-to-use online platform for businesses to manage all AVG Business solutions deployed in their networks. It provides real-time visibility of threats, comprehensive reporting, and management capabilities, all in a single platform.

Monitor threats from a single dashboard

Configure notifications based on specific device actions and monitor from a centralized dashboard for full transparency into individual device issues, as well as threats that might be spreading among connected devices.

Enterprise-grade security services

Our cloud-based endpoint protection and network security solutions provide a complete, in-depth defense against all forms of malware and other cyberthreats – whether they originate from inside or outside the network via email, websites, or the Internet.

Quick and easy setup

Choose an endpoint protection solution, set up the console, and assign your antivirus and patch management to your devices to protect them from cyberthreats. Organize your devices into groups, create setting templates, schedule tasks, and remotely deploy antivirus - all from a single, intuitive dashboard.

Install updates quickly

Remotely download and distribute virus and program updates to all devices from one console to save time and bandwidth.

Features

Network Discovery with remote deployment

Easily discover your entire IT network and deploy AVG Business security services to all your endpoints in minutes to keep your business safe.

Intuitive Dashboard

View all alerts at-a-glance, address issues, and get the information you need to make informed decisions, add services, and take quick action to increase uptime, stability, and security.

Device and Policy Management

Manage security for all devices with the AVG Cloud Management Console agent. Policy changes will automatically configure themselves on the agent-controlled devices in real time, requiring less maintenance and making it easier to scale business operations.

Detailed Reports

Generate and schedule easy-to-read, detailed activity reports with the click of a button. View reports that include blocked threats, task lists, protected devices, patch statuses, and more

Notifications

Receive instant email notifications on any security threats or network issues that need your attention, including outdated antivirus applications, extended device inactivity, and additional device updates.

Update Agent

Select a device as the Local Update Server where all updates can be downloaded. Save bandwidth by scheduling and distributing updates to all endpoints in your network when it's convenient.

Commands

Quickly apply commands across devices like scans, restarts, and more. Run commands automatically based on policy settings.

Services

AVG Antivirus Business Edition

Protects your endpoints from ransomware, malware, and other advanced cyberthreats.

AVG Internet Security Business Edition

Protects your endpoints, emails and networks from ransomware, phishing, and other threats.

Patch Management

Stay ahead of vulnerabilities by identifying critical patches and easily deploying them across all endpoints from one dashboard.

AVG File Server Business Edition

Protection for Windows servers to safeguard files and company data.

AVG Email Server Business Edition

Keep your emails safe and running fast from server to inboxes
